**by The Campus League of Puzzlers**

Solution to **PAINT BY NUMBERS:**

The missing letter is the answer, **O**.

Congratulations to Keita, Nishant Pappireddi, and Justin A. who were the first three to submit the correct answer to last week's puzzle on our website (http://puzzle.berkeley.edu).

The Campus League of Puzzlers is a group of students and alums who enjoy writing and solving puzzles. Our main event is the annual Berkeley Mystery Hunt, a 12 hour puzzle solving competition for teams of up to 10 people. This year's hunt will be Sunday, May 4; we'll have more information for you as that date nears.

The goal of this column, which runs in the Daily Cal and on our Facebook page each Thursday, is to introduce you to a wide variety of puzzles. The solutions to each of the puzzles will clue a single letter of the English alphabet. When you've solved the puzzle, visit our website to confirm your answer.

This week's puzzle is called a Divide by Boxes, or Shikaku. Draw rectangles in the grid below such that every square in the grid is part of one rectangle. Each rectangle contains exactly one number, which designates how many grid squares are contained in that rectangle. When you're done, shade the rectangles of sizes 2 and 6 to reveal the answer.

Week 7: DIVIDE BY BOXES
