The across and down entries disagree in each of the shaded squares. The across entry ends in **BOX**, while the down entry includes a single letter in that square. This suggests reading the letters in these boxes, which gives the answer **JACK**. Congratulations to Justin A., cw2o3, and phenomist who were the first three to submit the correct answer to last week's puzzle on our website.

The annual Berkeley Mystery Hunt will be held May 3, 2015. Registration is now open at <https://oskileaks.org>. Get together up to nine of your friends and get ready to solve some puzzles!

This column is the sixth in our ongoing series. When you think you know the answer, submit it on our website (<http://puzzle.berkeley.edu>).
