

ANATOMY OF THE TIME CAPSULES

Each time capsule that we have excavated has contained a reel of film (Object Type 0) and a container shaped like a brain. The brain containers have three compartments, and were labeled according to Figure 1. Each graduating class filled the Hindbrain compartment with a newspaper from that year that includes a Fiat Enigma puzzle (Object Type 1), the Midbrain compartment with a photo album (Object Type 2), and the Forebrain compartment with a memento (Object Type 3).

Further information on Object Types:

- (0) FILM REEL : The movies have been digitized for you and can be viewed on the website. The information in the movies will be important for the final part of the hunt.
- (1) NEWSPAPER + FIAT ENIGMA PUZZLE : The answers to the puzzles will give you pieces of a clue phrase. The full clue phrase will direct you to get a set of words.
- (2) PHOTO ALBUM : Each set of images will give you a single word answer.
- (3) MEMENTOS: The mementos are puzzles associated with the location of that year's class gift. The answers for these puzzles will be a single word.

Each brain section from each of the five time capsules will give you one answer. The five answers for the forebrain sections will form a forebrain meta puzzle and the five answers to the midbrain sections will form a midbrain meta puzzle. The answers from the hindbrain sections will form a clue phrase that will generate five new words which themselves form a hindbrain meta puzzle.

Submit your answers on the website in the Time Capsule page. For each time capsule, submit the forebrain and midbrain answers using the "Submit Answer" link in the appropriate column. You can check the piece of the clue phrase you get from the hindbrain puzzle using the "Check Clue Phrase" link in the hindbrain column.

When you have solved the meta puzzle for a brain section, submit the answer using the "Submit Meta Answer" link under the appropriate column. You will need to solve all three meta puzzles to proceed to the end of the hunt.
